Pre-Approved Course List

Revised 08/2009

The following table is a sample of national and statewide recognized courses available for Continuing Education credit. It would be impossible to list every course that is applicable to EMS education. You or your agency do not need pre-approval from the EMS Bureau to attend or sponsor these classes so long as the requirements by the sponsoring organization for such classes are met. Individuals completing any of these courses need only to submit their course completion certificate when they renew their license. Other courses not listed below may be eligible for Continuing Education credit. Also, all courses that are CECBEMS approved are pre-approved for credit in New Mexico. Contact the State EMS Training Coordinator at 505-476-8229 for more information.
